Objective

Motivated, results-driven third-year Electrical Engineering student with interests in circuit design, electronics, embedded systems, and hardware development. Hands-on experience in electrical assembly, soldering, programming, and engineering design, seeking a Summer 2027 electrical or hardware engineering internship to contribute to the design, testing, and development of electrical systems.

Education

Georgia Institute of Technology | Atlanta, GA **May 2026 – Present**
Bachelor of Science in Electrical Engineering, GPA 3.3 Expected Graduation December 2028
Georgia State University | Atlanta, GA **August 2023 – May 2026**
Associate of Science in Engineering, GPA 3.69

Experience

Roytec Industries | Woodstock, GA **July 2025 – February 2026**
Machinist
Assembled elevator electrical harnesses, conduits, and other small components for custom industrial applications.

- Worked with AWG 32 to 535 MCM wire, specialty cable, and multiple insulation materials while meeting safety and performance standards.
- Used precision stripping and assembly techniques, including hot blade sealing, soldering, on ribbon, coax, and multi-conductor cable.
- Operated hand tools and precision equipment to measure, cut, strip, and assemble components according to engineering drawings and production specifications.

Georgia State University | Stone Mountain, GA **October 2024 – May 2025**
Student Assistant

- Provided administrative support through data entry, filing, document preparation, and student assistance.
- Supported campus events through room setup, coordination, and communication with students and staff.

Projects

Chattahoochee River Temperature Modeling **Fall 2025**
Data Modeling / Team Project
Modeled USGS Chattahoochee River temperature data near Buford Dam and Norcross using second-order ordinary differential equations.

- Used MATLAB, Mathematica, and Desmos to evaluate solution curves and develop a best-fit model for seasonal river-temperature behavior.
- Compared temperature patterns at two locations and evaluated applications involving environmental changes, seasonal prediction, and climate trends.

Calculus II AI Study Companion **Spring 2025**
AI-Assisted Learning Tool / Personal Project
Developed an AI-powered study companion to help students practice and understand Calculus II concepts.

- Designed a study tool that generates practice problems, step-by-step explanations, and personalized feedback.
- Organized Calculus II topics and examples to help students identify weak areas and improve critical thinking skills.

Leadership or Activities

Georgia State University | Atlanta, GA
Traditions and Entertainment Director – Panthers Activities Council (PAC) **October 2023 – May 2025**

- Contributed to planning and executing campus events designed to increase student engagement.
- Collaborated with other council members to support a vibrant student community.

SI Leader – Multivariable Calculus for Engineers (MATH 2551) **September 2024–May 2025**

- Led weekly SI sessions for 10–20 engineering students helping engineering students understand multivariable calculus concepts.
- Guided students through practice problems and collaborative problem-solving.

Skills

- **Hardware/Technical:** Soldering, welding, electrical harness assembly, automotive repair
- **Software:** MATLAB, Mathematica, Python, Java, C#, Dart, Autodesk Inventor, SolidWorks, Onshape, KiCad
- **Communication:** Technical problem-solving, teamwork, presentations, student support
- **Languages:** English (fluent), Amharic (fluent)
